Getting the best PCI wifi card

2020/06/03

So I'm new to PC building and need help from those smarter and more experienced than I with wireless cards. I am currently using some cheap usb wireless adapter, but would like to switch to a pci card. I have an asus cross hair hero vi mobo, (the non-wireless one) and I want to know what my best option would be. I know it has the dedicated slot near the top of the board and the holes in the io shield, but what should I use to fill them? Also below is a picture of what the "sight line" is to the router, It is there below the cabinets against the wall on the right.<https://imageshack.com/a/img924/1986/11FUUF.jpg>
