Wi-fi Boost In Apartment

2020/06/04

Hey Guys, Starting next weekend I move into my new home, so this is my current situation. It's a two flat and my brother lives in the upstairs part of the house. He is going to let me use his internet for one less bill to pay so this got me thinking. Obviously the signal will be suffering since the modem will be upstairs, so I was thinking of buying a Wi-fi extender or setting up a router as a repeater to boost signal while also not having to go wireless with my pc. My only problem with the Wi-Fi booster is that it runs on the buildings powerlines. How would this work with a two flat I assume they would have different power setups so would this not work? Do you guys have any suggestions on what you would do in my situation? Here is what I was thinking of trying, I guess if it doesn't end up working I could send it back.
