Computer shuts down internet for whole house

2020/05/29

My computer which ive been using for about a year had no problems until a few months ago. Random freezes occurred and wifi would randomly turn off on the whole house. At a certain point my computer won't turn on. Turns out their where some hardware issues and now my computer is running smooth but their is still the wifi problem meaning I can't use internet. My wifi adapter is the dwa 130. Does anyone know why this occurs. I might switch to a dedicated PCIe card for wifi now.
