Max 100mbps on speedtest.net even though i have 1gbps service and gear  
2019/07/07

I just got a 1gbps service but i still get a max of 96.56mbps on speedtest.net. Can someone help me get it to 1gbps? I have fiber optics and i use a wireless conection. My equipment is as follows:Router: <https://www.asus.com/Networking/RTAC87U/>

Adaptor:

<https://eu.dlink.com/uk/en/products/dwa-182-wireless-ac1200-dual-band-usb-adapter>

Motherboard: <https://www.asrock.com/mb/Intel/H110M-DGS/index.asp>I should also mention that i use the 5GHZ band only on my PC. The other PCs and phones are on the 2.4GHZ band. Could it be something from the mobo that i could change in the bios? On my phone i get similar results(on both bands), however it is not limited to 100mbps. On pc the max it could reach is 100 while on my phone it is 300. Thanks in advance for any responses.
