Disconnecting from Internet every ~5 minutes

2019/07/07

- Laptop: Dell Inspiron 3520- Router: Linksys N600I lived in a house for two years and would randomly disconnect from the internet maybe once a day. I chucked it up to just bad connection as it wasn't a huge problem. I moved into an apartment for a month now that I'm in between leases and literally every 5 minutes, my connection drops and I have to reconnect to the router. The router I'm using now is not the same one from the last house but I have less connections to the new one (my laptop and phone). I'm not real tech savvy so I'm not really sure what steps to be taking here. Any ideas?
